

**YOU MIGHT BE DELCO'S BIGGEST HEARTBREAKER.
BUT WE'RE ITS BIGGEST HEART-FIXERS.**

Crozer-Keystone Health System has provided Delaware County with leading heart-care treatment for decades. The Crozer-Keystone Heart Institute features a team of cardiologists with vast expertise in the newest innovations, such as drug-eluting stents. In 1992, we performed the county's first angioplasty in heart attack patients, and since then, we've performed over 1,000. We are one of the few health systems in the area to offer these cardiac treatments in addition to caring for heart rhythm disorders.

But we understand that heart care doesn't begin and end with a list of capabilities—behind each case is a person. That's why we offer 24/7 cardiology services—the only facility in Delaware County to do so. Our doctors and nurses are there with you every step of the way, to answer every question—and hold each hand. We carefully explain the condition and each option, so together we make the right decision for you. And so you can continue to break hearts for a long, long time.

Call 1-800-CK-HEALTH [1-800-245-3258] to find a Crozer-Keystone cardiologist in your neighborhood and to receive a free copy of the Crozer-Keystone Heart Institute's *State of the Heart* report to learn how to take better care of yours. Please mention priority code: XXXX.
