

**WHEN IT COMES TO MATTERS OF THE HEART,
NEVER SETTLE FOR SECOND BEST.**

Crozer-Keystone Health System has provided Delaware County with leading heart-care treatment for decades. We performed the county's first angioplasty, and since then, we've performed more than 4,600. We were also the first in the county to perform open-heart surgery, and have since cared for over 3,000 patients.

But we understand that heart care doesn't begin and end with a list of "firsts." Behind each case is a person. Our doctors and nurses are there with you every step of the way, to answer every question—and hold each hand. We carefully explain the condition and each option, so together we make the right decision for you. Because while we can claim many firsts, our first priority is you.

Call 1-800-CK-HEALTH [1-800-245-3258] to find a Crozer-Keystone cardiologist in your neighborhood and to receive a free copy of the Crozer-Keystone Heart Institute's *State of the Heart* report to learn how to take better care of yours. Please mention priority code: XXXX.
